EDUCATION

Nha Trang University

Major: Information Technology

- **Language:** English Intermediate (TOEIC: 730)

Expected 2026

GPA: 3.0/4.0

TECHNOLOGIES

Languages: C#, TypeScript, JavaScript, Java, Python

Backend: ASP.NET Core 8, Node.js, Express.js, Spring Boot (Data JPA, Security), RESTful API design, JWT/OAuth2

Architecture & Cloud: Microservices, CQRS (MediatR), Event-Driven Architecture, Kubernetes (K3s), Docker, DigitalOcean, GitHub Actions (CI/CD)

Frontend: Next.js 16, React.js, TailwindCSS, Bootstrap 5, Shadcn, Ant Design, Zustand, Zod

Databases & Message Brokers: PostgreSQL, SQL Server, MySQL, MongoDB, Redis, RabbitMQ, MassTransit

EXPERIENCES

Intern Backend / DevOps

October 2025 – December 2025

INFOdation Vietnam

Vietnam

- Participated in the development of the **Energy Contract System**, a microservices-based application managing gas and electricity contracts.
- Implemented the Backend using ASP.NET Core 8, MediatR (CQRS), and FluentValidation pipeline behaviors, adhering strictly to Clean Architecture.
- Built a robust CI/CD pipeline using **GitHub Actions** for automated Unit Testing, Docker image building, and pushing to Docker Hub.
- Integrated **RabbitMQ** and MassTransit for asynchronous communication between services.
- Configured a PDF generation pipeline using PuppeteerSharp and QuestPDF, storing results in S3/MinIO.
- Scheduled recurring background jobs using **Quartz.NET**.

Intern

April 2024 – June 2024

FPT Software Nha Trang

Vietnam

- Participated in the development of **University Registration System** ([GitHub Link](#)).
- **Tech Stack:** JavaScript, React.js, Ant Design, Redux, Firebase services (authentication, realtime database, storage).
- Implemented a complete user authentication system using Firebase Authentication (registration, login, logout).
- Built the primary application feature allowing students to browse, select, and register for universities based on preferences.
- Utilized Firebase Realtime Database to store and sync all application data instantly across clients.

PERSONAL PROJECTS

BunBo System (Graduation Thesis) | [Live Demo](#) | Microservices, ASP.NET Core, K8s, Next.js, RabbitMQ, Redis

- Architected an enterprise-grade restaurant management and ordering system comprising 8 specialized microservices.

- Engineered a custom API Gateway using **YARP** and established inter-service communication via **gRPC** and REST.
- Designed an Event-Driven Architecture leveraging **MassTransit** and **RabbitMQ** to handle distributed transactions and asynchronous workflows.
- Developed a real-time notification system using **ASP.NET SignalR** scaled out with a **Redis Backplane**.
- **DevOps & SRE Implementation:** Containerized all services and deployed to a **Kubernetes (K3s)** cluster on DigitalOcean using Helm and Nginx Ingress.
- Built an advanced CI/CD pipeline utilizing GitHub Actions with **Matrix Builds** for 9 services concurrently, incorporating **Zero-Downtime Rollout** and **Automated Rollback** mechanisms upon health check failures.
- Built an SSR-enabled frontend using **Next.js 16**, React 19, Zustand, and TanStack Query.

Chat App Realtime (In-progress) | [GitHub Link](#)

- **Tech Stack:** TypeScript, React.js, TailwindCSS, Shadcn, Zustand, Node.js, Express.js, MongoDB, Web-Socket, JWT.
- Implemented a secure JWT-based authentication system with access/refresh tokens, utilizing httpOnly cookies to prevent XSS attacks and ensure persistent sessions.
- Designed and built a scalable RESTful API with Express.js and Mongoose, featuring a modular structure for maintainability.
- Architected real-time, bidirectional communication using Socket.IO for instant message delivery, typing indicators, and user presence status.

IT Seeker - Job Hiring Platform | [GitHub Link](#)

- **Tech Stack:** Java, Spring Boot, Thymeleaf, MySQL, OAuth2, Spring Security.
- Track and manage job applications with status updates (Pending, Accepted, Rejected).
- Comprehensive user profiles with CV upload and avatar customization.
- Seamless third-party authentication and secure user sessions.
- Intelligent job search with filtering by industry, salary, and job requirements.

Tasks Management App | [Live Demo](#)

- **Tech Stack:** JavaScript, React.js, TailwindCSS, Shadcn, Zustand, Node.js, Express.js, MongoDB.
- Add, edit, delete tasks, and toggle status by clicking corresponding icons.
- Filter by status and date using the UI controls.
